EXTENSION ACTIVITY – SOAP MAKING

Extension activities are an integral part of our college's commitment to community engagement and development. We conducted a soap-making extension activity for kudumbasree members and COK volunteers. The primary objective of this extension activity was to empower and train kudumbasree members in a new skill and thereby promote entrepreneurship and self-reliance among women.

The Soap making workshop was held on 25-02-2023 at Govt. College Mokeri. The participants included 20 kudumbasree members. In addition, training was given to students from other departments and COK volunteers. Hands-on demonstration of soap making was given by faculties from the chemistry department. Participants learned the art of soap making, which could serve as a source of income for them. Kudumbasree members expressed their interest in continuing soap making as a small-scale business. The soaps which were made during the programme were distributed among the college students and faculties.

Soap making hands-on training for students and kudumbasree members
