

GOVERNMENT COLLEGE MOKERI

DEPARTMENT OF CHEMISTRY

SCHOOL@LAB PROGRAM

The department of chemistry organized a programme called School@Lab on 22 July 2022, where students and teachers from nearby schools visited our chemistry and physics labs. During the event we showcased a range of science experiments alligned with their school curriculum, along with engaging demonstrations. This initiative allowed students to actively participate in conducting these experimnets, providing them a hands-on understanding of the subject. Furthermore, the department hosted a quiz competition based on these experiments.
