CAPACITY BUILDING AND SKILL ENHANCEMENT

Govt College Mokeri offers a supportive and amicable environment for its students to recognize, cultivate, and enhance their aptitudes and capabilities. It prioritizes the comprehensive development of its students, in alignment with its mission and vision. This is achieved through the provision of opportunities for skill enhancement and improvisation, which enables them to adapt more effectively to a globally interconnected, diverse, and rapidly evolving society.

Efforts undertaken by the institution to *enhance skills and build capacity* include departmental initiative like

- Communication Skills
- Confidence
- Creativity
- Time Management
- Decision Making Skills
- Negotiation Skills
- Team Management and Collaboration

The cultivation of soft skills is a fundamental component of our curriculum. *Soft skills* training initiated by departments aim to cultivate in students effective interpersonal and leadership abilities. Throughout the academic term, students are incentivized to engage in a multitude of activities coordinated by diverse organizations and societies, which affords them the opportunity to refine and showcase their abilities.

In order for its students to achieve *communication fluency and proficiency*, the college has implemented additional courses and utilized the Language Lab. Students are empowered to enhance their grammatical and communicative abilities by utilizing self-directed learning materials, multimedia resources, and free language learning softwares/apps available online. The institution also has add on courses that contribute towards the all-round development of the students enrolled.

Periodically, instructional programmes on *Yoga and meditation* are arranged for both faculty and students by the department of physical education. Additionally, the college has a fully-equipped gymnasium where students and faculty can engage in physical activity to enhance their overall well-being. Programmes addressing hygiene are consistently implemented in the institution.

In order to enhance students' learning experiences and improve the efficacy of the teaching process, the institution supplements traditional classroom instruction with *ICT-enabled* instruction. The institution furnishes a digital learning environment for both its faculty and students. The institution is equipped with Wi-Fi-enabled departments. In order to facilitate ICT-enabled instruction, the college has a comprehensive IT Lab, Language Lab, and

multimedia projectors. Complementary computer science courses are available at the degree level.
